CYBER | IRELAND
IRELAND'S CYBER SECURITY CLUSTER

Why partner with Irish cybersecurity businesses?
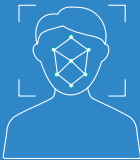

With some of the world's leading experts, researchers and companies in the cybersecurity space calling Ireland home, we're ready to help you defend against a new generation of threats.

Talent

Ireland is a hotbed of cybersecurity talent. We're home to 40 multinationals with security operations and over 60 homegrown cybersecurity companies, making for a 'Triple Helix' ecosystem bringing together business, academia and government to collaborate and problem-solve.

Innovation

The top five global security software companies are based in Ireland, and it's easy to see why: our deep tech clusters in fields such as machine learning, IoT and cloud technology are world-renowned, while R&D centres in Irish universities and national research centres are pushing innovation forward every day.

Trust

With a reputation for military neutrality and a track record in promoting international peace and cooperation, Ireland is a trusted country.

That's why we're a leading destination for data hosting - it's estimated Ireland is home to more than 30% of Europe's data. The most demanding global customers entrust Irish companies with their cybersecurity.

Discover more about a selection of Irish cyber security companies who are innovating to deliver greater protection, detection and deterrence to the world's most security conscious organisations.

Daon

Daon has been the most trusted name in biometric identity assurance for more than two decades on six continents. Daon's "IdentityX®" is your seamless "two-in-one" platform for Digital Onboarding and User Authentication that spans all four corners of the customer experience (mobile, desktop, call centre, and physical location). Their global-scale customer deployments have proven successful in even the most complex and demanding enterprise environments, spanning payments verification, digital banking, wealth, insurance, telcos, border security, and seamless travel.

GETVISIBILITY

Getvisibility is using state of the art AI to classify and secure your documents and emails in real-time. Getvisibility's dual approach to data classification allows staff to manually classify documents as they are created with suggestions and automated checking, while the machine learning algorithms scan, categorise and classify legacy data. The Getvisibility solution also provides organisations with risk assessments regarding compliance, permission management, data quality and user activity.

tines

Tines is a Security Orchestration, Automation and Response (SOAR) platform that aims to make the lives of security and operations teams easier through effortless automation. Flexible, robust, and easy to use, the enterprise platform creates space for high-impact work by enabling users to build their own automation stories to perform almost any repetitive manual process, regardless of use case or complexity. Built to save time, optimize resources, and minimize room for error, Tines integrates with other tools quickly and easily. Companies like Coinbase and Canva trust Tines to automate analyst activity and perform remediation actions in the event of a threat.

Cyber Risk Aware
Creating your human firewall!!

Cyber Risk Aware, recognised in Gartner's 2020 Security Awareness Training Market Guide, helps companies manage human cyber risks in their business, enabling clients to protect their network, meet compliance obligations and maintain security accreditations. Cyber Risk Aware's industry leading human cyber risk management, security awareness training and behaviour change platform features GCHQ accredited security awareness content, simulated phishing and a unique real-time capability, automatically educating all staff, on any device, in any location, in their exact moment of need, immediately in response to their specific actions on the network. Scheduled training is no longer fit for purpose, only real-time training can truly deliver long-term behavioural change.

GuardYoo

GuardYoo is a Cybersecurity vendor delivering automated Compromise Assessment and Forensic Analysis via a SaaS Platform. GuardYoo is known for its ability to deliver fully automated cyber audits within 1 week to determine if a company's network has been compromised without their knowledge. GuardYoo's goal is to help alleviate the global cyber skills shortage by providing cyber experts with the forensic tools they need to help protect organisations from cyber criminals.

TitanHQ™

TitanHQ is a 25-year old multi award-winning web filtering, email filtering and email archiving SaaS vendor. TitanHQ protects over 7,500 businesses and works daily with over 1,500 MSP's. All their platforms are hosted in the cloud. They work with SMBs, MSPs, ISPs and Telcos. TitanHQ protects your customers from malware, ransomware, phishing, viruses, botnets and other cyber threats. Most importantly their products were built from the ground up with MSP's for MSP's. TitanHQ saves MSP's support and engineering cost by stopping cyber threats at source for their clients.
